EDUCATION

Dhirubhai Ambani Institute of Information and Communication Technology (DAIICT), Gandhinagar, Gujarat 2025 – Present

B.Tech — Information and Communication Technology (ICT-CS)

CPI/CGPA: 7.86

Radiant English Academy

2025

Class 12 — Science (PCM + CS)

Score: 91.2%

EXPERIENCE

Data Annotator — Freelance

June 2026 – Present

DataAnnotation.tech

- Performed AI-assisted annotation tasks — text, code, and conversation evaluation — to support large language model training pipelines.
- Handled diverse task types: ranking model outputs, crafting prompts, verifying factual accuracy, and assessing response quality.

TECHNICAL SKILLS

- Languages:** C++, Python
- AI / GenAI:** LangChain · LangGraph · Groq · Models · Prompts · Chains · LCEL/Runnables · Output Parsers · Structured Output · RAG · Agents · Tool Calling · Document Loaders · Text Splitters · Vector Stores (FAISS, ChromaDB) · Retrievers · Persona / System Prompting · Few-Shot Prompting
- ML / NLP:** Word Embeddings, Word2Vec, HuggingFace Sentence-Transformers
- Frameworks / Tools:** Gradio, Streamlit, SQLite, Git, GitHub, Arduino IDE, VS Code
- Hardware:** Arduino, ESP32
- CS Concepts:** DSA, Arrays, Recursion, STL, Greedy, Basic Graphs

PROJECTS

PromptForge

2026

Python, LangChain, Groq, Gradio

- Built a multi-persona chatbot (Technical Explainer, Debate Coach, Code Reviewer, Creative Writer) using Groq's Llama-3.3-70B; implemented few-shot prompting, real-time streaming responses, and an adjustable-temperature Gradio UI.

StartupAdvisorAI

2026

Python, Groq, Gradio

- Built a startup advisory chatbot with five role-specific advisor personas (Marketing, Finance, Product, Sales, Customer Research), each scoped with explicit domain guardrails to keep responses within its area of expertise.

DocBuddy Pro

2026

Python, LangChain, ChromaDB, Groq, Gradio

- Built a PDF question-answering RAG app with LangChain, ChromaDB, and HuggingFace embeddings; implemented chunking, persistent vector storage, and an anti-hallucination prompt validated across multi-document retrieval tests.

YouTube RAG Bot

2026

Python, LangChain, FAISS, Groq, Gradio

- Built a RAG pipeline that answers questions from YouTube video transcripts using the YouTube Transcript API, FAISS vector search, and Groq Llama-3.1, with bilingual (Hindi/English) transcript support.

AgentX

2026

Python, LangGraph, LangChain, Groq, SQLite, Streamlit

- Built an agentic research assistant with LangGraph featuring conditional tool-calling (Wikipedia, DuckDuckGo, date lookup), SQLite-backed persistent memory across multi-threaded conversations, and a Streamlit UI with live tool-execution status.

ACHIEVEMENTS & ACTIVITIES

1st Place — Electrothon Hackathon (DAIICT)

2024–25

Ideation-based embedded systems hackathon · Electronics and Hardware Club, DAIICT

- Designed and pitched an innovative embedded systems solution; won 1st place among all participating teams.

Competitive Programming

Ongoing

Codeforces | LeetCode

- 185+ problems on Codeforces (Rating: 741) and 104 on LeetCode — arrays, recursion, STL, greedy, graphs.

Electronics and Hardware Club (EHC) — Active Member

2025–Present

DAIICT, Gandhinagar
